

# overview

## Getting Started

### How do I get Terra Studio?

Apply for Early Access on [our website](#), and we'll get in touch with you shortly.

Terra Studio is available in two versions.

- **Browser Version:** You will need a username and password
- **Desktop Version:** If you prefer working on your Windows Desktop or MacBook, you'll need to download an installable file.

Terra Studio currently does not have a mobile version available on Google Play Store or Apple App Store.

### Minimum system requirements

For Terra Studio to function properly, your machine should have a minimum of 16 GB RAM.

### Creating Your First Game with Terra Studio

- To kickstart your new game, simply click `+ START FROM SCRATCH` on the homepage. This will prompt a dialog box where you can name your project.
- Once you've defined the title, a new workspace will open up, providing you with the platform to unleash your creativity. Let's get those ideas flowing!

## How do I download & install Terra Studio?

Terra Studio is currently in closed alpha access. You can apply on [our website](#) to get access to our app. We'll send you details on how to download Terra Studio.
